Cryptocurrency news april 28 2025

"Bitcoin attracted \$557 million in inflows, a decrease from the prior week, likely due to continued hawkish signals from the US Federal Reserve. Short-bitcoin products saw a fourth consecutive week of inflows, totaling \$5 <https://slwebsitedesign.com/idaho/.8> million, reflecting investor positioning amid recent price gains," read an excerpt in the report.

These positive crypto inflows come as markets continue to shrug off Trump tariffs. Accordingly, the US topped the positive flows. It beat Germany and Hong Kong with \$681 million inflows against \$86.3 million and \$24.2 million, respectively.

The latest CoinShares report indicates crypto inflows totaling \$785 million recorded for the week ending May 17. While it represents a slight drop from the previous week's \$882 million, it marks the fifth week of consecutive positive flows.

Crypto intelligence tracker DefiLlama data shows that Cardano's chain DEX trading volume has constantly fallen since early December and currently reads \$3.06 million on Tuesday. This fall in volume signaled decreased user activity and liquidity in the ADA blockchain, indicating a bearish outlook.

However, it seems clear that governance changes are a key priority for developers. In December, Hoskinson criticized the Cardano Foundation's governance model and co-authored a proposal to significantly change it.

Cardano price faced rejection around the daily resistance at \$0.84 on May 13 and declined 10% in the next four days. This daily level coincides with the 50% Fibonacci retracement (drawn from the March 3 high of \$1.17 to the April 7 low of \$0.51) at \$0.84, making this a key resistance zone. However, ADA

retested and found support around its 200-day Exponential Moving Average (EMA) at \$0.71 on Sunday. At the time of writing on Tuesday, it trades slightly down at around \$0.73.

One Cardano (ADA) is currently worth \$0.74 on major cryptocurrency exchanges. You can also exchange one Cardano for 0.00000699 bitcoin(s) on major exchanges. The value (or market capitalization) of all available Cardano in U.S. dollars is \$26.26 billion.

SEC closes investigation into Crypto.com. On March 27, Crypto.com announced that it had received a No-Action Letter closing the SEC's investigation in the crypto exchange. Crypto.com had reportedly received a Wells Notice from the Commission in August 2024 asserting that several of the cryptocurrencies sold on Crypto.com were unregistered securities. In response, Crypto.com filed a declaratory relief action in the US District Court for the Eastern District of Texas in October 2024, seeking to enjoin the SEC from bringing a civil action against the exchange.

The Bitcoin Rainbow chart is a visual tool that leverages a logarithmic growth curve overlaid over price action to describe investor sentiment. It is divided into nine color-coded zones, each of which corresponds to a specific price range at any given time.

Hoskinson's comments about Ethereum reflect a broader skepticism about its ability to adapt and stay relevant amidst rising competition. His support for a technical proposal by Buterin, however, suggests there are still opportunities for evolution within Ethereum's ecosystem.

The Staff Statement does not address all material disclosure items, but

focuses on certain disclosure requirements set forth in Regulation S-K that apply to registration forms under the Securities Act of 1933, as amended, and the Securities Exchange Act of 1934, as amended, Form 20-F, and Form 1-A.

California DFPI issues proposed regulations on DFAL. On April 4, the California DFPI issued proposed regulations to implement the state Digital Financial Assets Law (DFAL), which requires digital asset companies operating in the state to obtain a license, maintain records, and submit reports to the state. Among other things, the regulations exempt from the state money transmission act "any money transmission of legal tender occurring in, associated with, or related to the normal, typical, or customary performance of digital financial asset business activity." Comments must be submitted by May 19.

Although tariffs and trade conflict dominated market attention, institutional investment in the crypto industry continued at a healthy pace, supported by increasing regulatory clarity (for more details, see March 2025: Institutional Chain Reaction). There are now two distinct trends: (1) traditional financial services firms investing in crypto, and (2) crypto-native firms starting to offer traditional financial services. Examples from the last month include reporting that Dutch bank ING is working on a stablecoin, moves by Mastercard to bring stablecoins into its payments network, an announcement from crypto exchange Kraken that it will offer equity and ETF trading, news that BitGo and others are working to get U.S. bank licenses, and the introduction of a new payments platform by stablecoin issuer Circle.
