We made it our goal to review any online casino that exists, with a focus on fairness and player safety. Thanks to this, you can find information about virtually all available online casinos and choose from the largest selections of casino sites on Casino Guru.

Basically, we look for anything that could make your online casino experience unsafe or less enjoyable. The higher the Safety Index, the more likely you are to be able to enjoy real money online casino games and be able to cash out your winnings from the casino without running into issues which might be common at online casinos with a low Safety Index.

Known for its fast-paced and energetic nature, Craps is one of the popular casino games that players love to play. While playing this game, players bet on how the roll of a sequence or rolls turns out. Bets can be made on a number of different things like a specific number can be rolled or whether the shooter will "make" or "crap out". At first, the complexity of wagering options can be quite intimidating or daunting, but players are drawn to its thrill and excitement.

To get the most out of betting sports with real money, it is vital to participate in the practice known as "line shopping". Line shopping is the act of comparing betting odds between multiple real money betting sites, and betting at the site with the better odds for the side of the bet you plan to make. For underdog picks this is straightforward, the more money made for a winning pick the better. When betting on the moneyline for any favorites, line shopping entails finding the sportsbook that requires you to bet the least amount of money in order to still win the same amount of money that you want. This is the easiest way to stay ahead and win at real betting sites.

When it comes to the best sports betting apps for real money, it's really no surprise that DraftKings and FanDuel stand out as the cream of the crop. With lengthy resumes as the trustworthy betting apps in the US market, these are two brands that I personally trust wholeheartedly as someone who has used a lot of different sportsbooks in their day.

While the Hard Rock Bet app is still a relative newcomer when it comes to the US sports betting apps scene, they're certainly making their mark as an

exciting brand and app in the space. Backed by the Hard Rock International machine, the Hard Rock Bet app also has the distinction of being the only legal sports betting app that is currently live in the state of Florida.

Donut County is a relaxing game that tasks you with causing as much chaos in a small town as possible. You direct a hole in the ground to swallow objects on the surface, with the hole growing each time something falls within your depths. Eventually, you'll be taking on buildings and other structures, wreaking havoc.

Star Wars games have a long and storied history, but Knights of the Old Republic (KOTOR) is widely considered the best of all time. Set thousands of years before the movies, KOTOR lets you walk the line between the light side and the dark, allowing you to fall to one side or the other at your own choosing.

Welltaro dons a pair of gunboots, shooting monsters in a procedurally generated environment to make progress downward. Both the control scheme and the color palette are minimal, but upgrades and strategies add complexity.

Gwent is a spin-off from the popular mini-game in The Witcher 3: Wild Hunt. It's a deckbuilder much like Hearthstone, but set in the Witcher universe. You'll see characters you know and love from the books and games, too.

The sequel to the original KOTOR, Star Wars: Knights of the Old Republic II was developed by Obsidian and took a much more nuanced approach to the Star Wars formula. Characters are more morally grey and your decisions feel like they have more weight than in the first KOTOR.
