Being the trailblazer and the first to appear on the market, Bitcoin is the 'OG' cryptocurrency that created a truly global community capable of making transactions without needing to trust the legacy financial system mega moolah instructions.

One of the biggest winners is Axie Infinity – a Pokémon-inspired game where players collect Axies (NFTs of digital pets), breed and battle them against other players to earn Smooth Love Potion (SLP) – the in-game reward token. This game was extremely popular in developing countries like The Philippines, due to the level of income they could earn. Players in the Philippines can check the price of SLP to PHP today directly on CoinMarketCap.

However, Bitcoin is a relatively young asset, and its volatility often counts against it as a store of value. For risk-averse investors, the massive volatility that Bitcoin has historically exhibited can be a severe drawback.

Cryptocurrency prices

IEO stands for Initial Exchange Offering. IEOs share a lot of similarities with ICOs. They are both largely unregulated token sales, with the main difference being that ICOs are conducted by the projects that are selling the tokens, while IEOs are conducted through cryptocurrency exchanges. Cryptocurrency exchanges have an incentive to screen projects before they conduct a token sale for them, so the quality of IEOs tends to be better on average than the quality of ICOs.

Cryptocurrency prices are affected by a variety of factors, including market supply and demand, news, and government regulations. For example, news about developments in a cryptocurrency's underlying technology can affect its price, as can news about government regulations. Also, the supply and demand of a particular cryptocurrency can affect its price. Finally, market sentiment and investor confidence in a particular cryptocurrency can also play a role in its price. We cover sentiment and technical analysis for example you can check top coins : Bitcoin, Ethereum, XRP, Cardano, Dogecoin.

Let's quickly calculate the market cap of Bitcoin as an example. The Bitcoin price is currently \$ 106,283 and there are 19.87 million BTC coins in circulation. If we use the formula from above, we multiply the two numbers and arrive at a market cap of 2,111.59 billion.

Price volatility has long been one of the features of the cryptocurrency market. When asset prices move quickly in either direction and the market

itself is relatively thin, it can sometimes be difficult to conduct transactions as might be needed. To overcome this problem, a new type of cryptocurrency tied in value to existing currencies – ranging from the U.S. dollar, other fiats or even other cryptocurrencies – arose. These new cryptocurrencies are known as stablecoins, and they can be used for a multitude of purposes due to their stability.

At the time of writing, we estimate that there are more than 2 million pairs being traded, made up of coins, tokens and projects in the global coin market. As mentioned above, we have a due diligence process that we apply to new coins before they are listed. This process controls how many of the cryptocurrencies from the global market are represented on our site.

Welch pitched the HAWK cryptocurrency as a community reward for her fan base, but the launch didn't work as planned. The crypto token price crashed soon after reaching a £373 million (\$500 million) market cap, resulting in massive losses for Welch's fans who invested in the digital asset. Court records showed investors claimed to have lost over £111,917 (\$150,000) in the HAWK meme coin.

The coin's market capitalization was around \$28 million as of Thursday afternoon, down from nearly \$500 million when it peaked Wednesday, according to DEX Screener, which monitors the price, trading volume and on-chain trades of various tokens.

Before Tuesday (March 25), there had not been a post on Instagram from Welch for five weeks, the previous X / Twitter post from her was December 20, and there hasn't been a new episode of the Talk Tuah Podcast since December 3.

"She admits that she didn't know anything about it but decided to endorse it anyway and promote it?" one YouTube comment read. "You should have never attached yourself to something you didn't understand," another said.
